**YOU HAVE
OUTSTANDING
INTEREST!**

Account Number: 58 2217 0649

Your payments are currently suspended by forbearance, but you are still accruing interest on your balance.

How can I help? The proof is in the numbers. If you are able to pay the interest while your payments are suspended, this could save you money in the future!

Paying some or all of your interest before it is capitalized (added to your principal balance) will save you money over time **and** reduce the amount you'll be expected to pay monthly after your forbearance.

For details on your outstanding interest, review the back of this letter.

Ways To Pay

Pay Online:	MyFedLoan.org
Pay By Phone:	800-699-2908
Pay By Mail:	Department of Education FedLoan Servicing PO Box 790234 St. Louis, MO 63179-0234

Include your account number, 58 2217 0649, on a check or money order made payable to FedLoan Servicing.

You are still obligated to pay your loans at the end of your forbearance, at which point you'll need to make regular monthly payments.

If you can afford to make regular monthly payments now... you should cancel your forbearance (which you can do at any time). If you cancel it, any unpaid interest will be capitalized and you have to pay regular monthly installment payments.

What if I can't or don't want to pay my interest? That's okay. You are not required to pay it while your payments are suspended. You can just let it capitalize at the end of your forbearance. But if you can afford to pay any of your interest, you should!

*This is the total amount of interest that will capitalize (be added to your principal balance) at the end of your forbearance if you do not make a payment to satisfy the full amount prior to the **Anticipated Capitalization Date**. You will pay more over time since you will be accruing interest on a higher loan balance.
